

ORIGINAL BARK MULCH

Our Mulch is made from Hemlock, and is naturally red in colour. It will gradually breakdown in your garden, adding nutrients to your soil. It is finely shredded which makes it easy to move around the garden.

We suggest putting down a minimum depth of 3 inches to help retain moisture, which will allow you to reduce the amount of watering, and up to a depth of 5 inches to control weeds. Premium Bark Mulch will give you a professional-looking garden.

APPLICATION GUIDELINES

- 3 inches covers 108 sq ft
- 1 inch covers 325 sq ft
- 1/4 inch covers 1300 -2000 sq ft

AVAILABILITY

- Available in BigYellowBag®
- Original size- 1 cubic yard
